Education

University of Cincinnati

Expected May 2028

Bachelor of Science in Computer Science (GPA: 3.88/4.00)

Cincinnati, OH

- **Certifications:** AWS Certified Cloud Practitioner, DeepLearning.AI Supervised Machine Learning

Experience

Computer Vision Research Assistant

Aug 2025 – Dec 2025

Feng Chia University

Taichung, TW

- Fine-tuned and evaluated a Vision Transformer using transfer learning for a **38-class** plant-disease classification task, achieving **99.78%** accuracy through data augmentation and hyperparameter tuning
- Built an end-to-end PyTorch/Hugging Face training pipeline and conducted class-level error analysis to diagnose imbalance, edge cases, and recurring mis-classification patterns

Digital Technology Solutions Intern

May 2025 – Aug 2025

University of Cincinnati

Cincinnati, OH

- Developed production Angular features for UC's indoor-navigation platform, integrating reusable UI components with MapsIndoors and Google Maps APIs
- Validated application behavior against CAD plans and provided third-level production support, identifying mapping inconsistencies and debugging issues before release

Software Applications Intern

Jan 2025 – Apr 2025

Danlaw

Novi, MI

- Shipped pages and features for a production Angular application and collaborated with engineers to troubleshoot frontend and backend issues across the stack
- Authored and maintained OpenAPI documentation for internal REST APIs, improving developer onboarding and cross-team understanding of application services

Projects

Kortex – AI-Native Document Intelligence Platform | Python, FastAPI, Angular, LangChain, ChromaDB, Claude, Docker

- Built a full-stack **RAG** platform for natural-language Q&A over uploaded documents using FastAPI, LangChain, Claude, vector retrieval, streamed responses, and grounded citations
- Implemented **agentic tool-calling** workflows for document retrieval, metadata search, summarization, and response validation through modular Anthropic Claude API integration
- Built an **LLM evaluation harness** across **100+** benchmark queries, measuring groundedness, citation accuracy and latency to optimize prompt and retrieval configurations

Hackathon – Momentum (Business Operations & Manufacturing Analytics Platform) | Python, MySQL, Pandas, Power BI

- Built a Python/MySQL analytics platform across **5,000+ records**, combining ETL, operational KPIs, demand forecasting, a reorder simulator, and Power BI dashboards to drive **business recommendations**

Atlantis – Secure Real-Time Collaborative Messaging Platform | Node.js, Express.js, MongoDB, Azure, Socket.io

- Built a secure real-time messaging platform using Node.js, Express, MongoDB and Socket.io with authentication, role-based access, REST APIs, **Azure deployment**, and CI/CD through GitHub Actions

Technical Skills

Languages: Python, Java, SQL, R, JavaScript, TypeScript, C++, C, C#, Assembly

AI/ML: RAG, Agentic Workflows, LLM Evaluation, Prompt Engineering, LangChain, PyTorch, Hugging Face, Scikit-learn

Frameworks & APIs: FastAPI, Angular, Node.js, Express.js, Apache Kafka, REST APIs, OpenAPI/Swagger

Databases & Analytics: MySQL, MongoDB, ChromaDB, Pandas, NumPy, Power BI, Excel, Matplotlib

Cloud & DevOps: AWS Lambda, AWS S3, AWS DynamoDB, AWS Redshift, AWS Kinesis, Azure, Docker, Git/GitHub

AI Development Tools: Claude Code, Codex, Github Copilot, Cursor
